

## Cookies in use on this site

### Cookies and how they benefit you

Cookies are small text files that are placed on your computer or mobile phone when you browse websites. Most websites use cookies to help provide users with a better experience. Our websites do not intentionally use cookies.

### We do not use cookies to

- Collect any personally identifiable information (without your express permission)
- Collect any sensitive information (without your express permission)
- Pass data to advertising networks
- Pass personally identifiable data to third parties
- Pay sales commissions

### Granting us permission to use Cookies

If the settings on your software that you are using to view our websites (*your browser*) are adjusted to accept cookies we take this, and your continued use of our websites, to mean that you are fine with this. Should you wish to remove or not use any cookies from our site you can learn how to do this below, however doing so may mean that our site will not work as you would expect.

### More about our cookies

#### Our own cookies

We do not believe we use cookies on our website. If we do then those cookies make our websites work. There is no way to prevent these cookies being set other than to not use our site.

#### Third party functions

Our sites, like most websites, may include functionality provided by third parties. Our site includes the following which may use cookies: *Google and Google analytics by MonsterInsights*, though we believe the latter is not enabled.

Disabling these cookies will likely break the functions offered by these third parties.

#### Turning cookies off

You can usually switch cookies off by adjusting your browser settings to stop it from accepting cookies. Doing so however, is likely to limit the functionality of our websites together with a large proportion of the world's websites, as cookies are a standard part of most modern websites

It may be that your concerns around cookies relate to so called "spyware". Rather than switching off cookies in your browser you may find that anti-spyware software achieves the same objective by automatically deleting cookies considered to be invasive.
